CLEAN VERSION OF AMENDMENTS

IN THE CLAIMS

Please amend claims 12 and 16, to read as follows:

---

1   12. (Amended) A method, comprising:

2   inputting a display data channel to a monitor by an inputting device;

3   driving said inputting device with a predetermined electric signal by a driving device;

4   indicating whether said display data channel of said monitor is inputted into said computer

5   and outputting a signal according to a result of said inputting by an interfacing section, said

6   interfacing section outputting the same voltage signal as an initial signal, the outputted voltage signal

7   is switched at a different time according to a result of inputting the display data channel;

8   controlling said driving device by generating said predetermined electric signal;

9   analyzing said output signal from said interfacing section; and

10   determining whether said result of said inputting said display data channel is correct.

---

1   16. (Amended) A method, comprising:

2   inputting a display data channel to a monitor by an inputting device;

3   driving said inputting device with a predetermined electric signal by a driving device;

4   indicating whether said display data channel of said monitor is inputted into said computer

5   and outputting a signal according to a result of said inputting by an interfacing section;

6   controlling said driving device by generating said predetermined electric signal;

7   analyzing said output signal from said interfacing section; and

8   determining whether said result of said inputting said display data channel is correct,

9   with said controlling and determining including a programmable logic controller,

10   with said programmable logic controller magnetizes a relay coil of said driving device and turns-on

11   a relay switch of said driving device to input said display data channel to said monitor.
